Pesiplex PTX2 is a 2 button code hopping wireless transmitter designed for long range wireless access control. Each transmitter is encoded with a site code and a unique transmitter code with the button information, that could be used by most of the standard access control systems.

The astatically designed transmitter has big color coded buttons with an LED to show transmission activity. The PTX2 is also hermetically sealed to protect against water & other substances. It also delivers an impressive transmission range of 100 ~ 200 meters in open environments. This transmitter offers convenience and with unmatched performance.

TECHNICAL INFORMATION

Number of Buttons: 2
Opt. Frequency: 433.92Mhz
Modulation: ASK
Open Space Range 100 ~ 200 Meters
Battery Type: 3V Lithium - Ion
Average Battery Life: 12 ~ 24 Months
Auto Shutoff: 5 Seconds
Activity Display: 1 Red LED
Opt. Temperature: -20℃ ~ +50℃

STANDARD FEATURES

- » 2 Buttons for Access Control & Personal Alarm
- » Long range transmission upto 200 meters
- » Transmission Code Hopping prevents duplication
- » Optional HID device for short range use
- » Hermetically sealed for water & dust resistance

PERSONAL ALARM DEVICE FEATURE

With designated receivers installed in desired areas, the Red Button on the PTX2 can be used as a personal Alarm Device. In the event of an emergency any receiver close to the person will activate an alarm relay. This relay can be used for annunciation or to activate a 3rd party alarm system.

COMPATIBLE RECEIVER

The PRX433 is a multipurpose receiver specifically designed to work with the PTX2 & PTX4 Transmitters

OPTIONAL SHORT RANGE PROXIMITY

With the installation of an HID compatible proximity module, the PTX2 can be used on short range proximity module, the PTX2 can be used on short range proximity readers for standard door access control. This will eliminate the need to carry an additional access control device.
